U-Reg

Back-end Software Engineer(s) – Singapore

U-Reg is a recently established fintech which aims at becoming a leader in the global regulatory space by solving the KYC problem first. You will join a fast-growing team of seasoned finance professionals and engineers dedicated to bring efficiencies to the financial industry by providing a secure document exchange repository, an efficient document life cycle management solution together with powerful data analytics.

We are looking for back-end developers with different levels of seniority to join our IT team. We are in the process of building of our in-house engineering team and you will be responsible for the server side of our core application, a document repository and analytics platform. You will need to first become familiar with the platform and understand how it works so that you can support it and provide new functionalities such as APIs and analytics. You will also get the support of the development team from a third-party provider. Tech stack includes mysql, php, solr and javascript.

We are looking for candidates who are curious, who want to understand how things work to then develop new applications or improve existing ones. You preferably have the following experience and skills, or are willing to acquire them:

- Participate in the entire application lifecycle, focusing on coding and debugging
- Write clean and well documented code to develop functional applications
- Be very fluent with relational databases and php
- Follow emerging technologies
- python or nodejs are a plus

We provide competitive packages. You will work in a flexible environment where you are encouraged to grow quickly and learn both on the tech and business side, share your knowledge and contribute directly to the growth of the company. We are focused on results and are looking who candidates who also want to make a difference.

Requirement: Candidates must hold Singapore citizenship or PR status.

DATA PRIVACY
You have the right to access, correct, modify, update, rectify, request for the deletion of data or withdrawal of consent. We will hold and process your data for as long as necessary to consider you for employment. You can withdraw your consent for us to hold your data at any time and we will delete it unless continued retention is required for compliance documentation .
