U-Reg

Software Engineer Intern(s) – Singapore

U-Reg is a recently established fintech which aims at becoming a leader in the global regulatory space by solving the KYC problem first. You will join a fast-growing team of seasoned finance professionals and engineers dedicated to bring efficiencies to the financial industry by providing a secure document exchange repository, an efficient document life cycle management solution together with powerful data analytics.

We are looking for several interns to join our IT team. You will be part of our in-house engineering team and will be responsible for the support of our core application, a document repository and analytics platform. You will need to first become familiar with the platform and understand how it works before we assign you to work on several projects ranging from UI design and development, whole lifecycle of data analytics or more complex topics such as machine learning. Tech stack includes mysql, php, solr, javascript and python.

We are looking for candidates who are curious, who want to understand how things work to then develop new applications or improve existing ones. You preferably have the following experience and skills, or are willing to acquire them:

- Write clean and well documented code to develop functional applications
- Understand relational databases and php and/or javascript
- Follow emerging technologies
- python or nodejs are a plus

You will work in a flexible environment where you are encouraged to grow quickly and learn both on the tech and business side, share your knowledge and contribute directly to the growth of the company. We are focused on results and are looking who candidates who also want to make a difference.

Requirement: Candidates must hold Singapore citizenship, PR status, a Work Holiday Pass or a Student Pass and be registered in an approved institution.

DATA PRIVACY
You have the right to access, correct, modify, update, rectify, request for the deletion of data or withdrawal of consent. We will hold and process your data for as long as necessary to consider you for employment. You can withdraw your consent for us to hold your data at any time and we will delete it unless continued retention is required for compliance documentation .
